

Release Note for Vigor2926 Series

| | |
|-------------------|---|
| Firmware Version: | 3.9.4.1 |
| Release Type: | Normal |
| Applied Models: | Vigor2926, Vigor2926n, Vigor2926ac, Vigor2926L, Vigor2926Vac, Vigor2926Ln, Vigor2926Lac |

Vigor2926 series is a broadband router which integrates IP layer QoS, NAT session/bandwidth management to help users control works well with large bandwidth. The state-of-art routing feature, VPN security, and Dual-WAN provide integrated benefits for professional users and small offices.

New Features

- None.

Improvement

- Improved: Adjust router's self-signed certificate to comply with new browser restrictions.
- Start on 2020-09-01, many client OSes/browsers will enforce publicly trusted TLS server certificate lifetime to 398 days or less, and connections will be rejected if the certificates violated this rule, so this firmware patch will automatically re-sign all the self-signed certificates lifetime to 395 days (was 2 years or longer in older versions).

Known Issue

- None.

Notes

- Vigor router supports the mesh network; however, it is not guaranteed to fit your environment. It might not be available and restricted due to the physical connection, actual environment, signal strength, and excessive interference.
