Subject: Notice of Completion of the Engineering Investigation and Requirement for an Initial  
Production Inspection (IPI)

Dear Ms. Chang:

Any information and documentation involving UL Mark services are provided on behalf of Underwriters Laboratories Inc. (UL) or any authorized licensee of UL.  
The engineering investigation under the above project number has been completed. This letter does not authorize use of the UL Mark on the products under the above project number.

Before you may begin shipping product with the UL Mark at each of the manufacturing locations listed below, an Initial Production Inspection (IPI) must be successfully performed by a UL representative at the manufacturing location(s):

1. SMART CABLING & TRANSMISSION CORP  
10TH FL NO 493 CHUNG CHENG RD HSIN TIEN TAIPEI HSIEN 231  
TAIWAN

The IPI is intended to confirm that the manufacturer is capable of producing a product in accordance with UL's requirements. **THE MANUFACTURER MAY NOT SHIP PRODUCTS WITH THE UL MARK UNTIL THE IPI HAS BEEN COMPLETED AND UL HAS FOUND THE PRODUCTS AT THE FACTORY TO COMPLY WITH OUR REQUIREMENTS.** Once this has been successfully completed the manufacturer(s) will be granted authorization to ship products bearing the UL Listing Mark.

It is the responsibility of Smart Cabling & Transmission Corp C/O Sporton International Inc, the Applicant, to inform its manufacturers of that the IPI must be successfully completed before product may be shipped with the UL Mark. Instructions for the IPI will be sent to our inspection center nearest to each of your manufacturing locations. The contact information of the inspection center is provided at the end of this letter. Please contact the inspection center to schedule the IPI and ask any questions you may have regarding the IPI.

CUL - Canada has statutes and regulations such as the Consumer Packaging and Labeling Act, requiring the use of bilingual product markings on products intended for the Canadian market. It is the responsibility of the manufacturer for the inclusion of such markings on its products. The UL Follow-Up Services Procedure will only include the English version of the markings.

In any correspondence concerning this investigation, please refer to the above file and project number.

Sincerely,

Joseph Petilla  
Engineering Team Leader
