

HDMI (HDBaseT) CAT5 Extender Series

ITEM NO.: HE02N HDMI (HDBaseT) CAT5 Extender with Ethernet/ARC/RS232

Extend high-resolution HDMI and IR up to 100M with this HDMI over single cat5e/cat6 extender. This extender uses HDBaseT technology to extend uncompressed high-definition video/audio with a data transfer rate of 10.2Gbps. This product also meets all HDMI v1.4 standards including full 3D support, HDMI Ethernet Channel, audio return channel and 4Kx2K Resolution. Additional Ethernet ports on both the Sender and Receiver are connected to standard network devices such as 100Base-T routers, hubs and computers. HDMI and Ethernet signal can be transmitted simultaneously without affecting each other. This product offers the ideal solution for extending high-definition video and audio over long distances.

Cable:

Link cable recommend use high quality Cat.5e·Cat.6·Cat.6a·Cat.7 UTP / STP or FTP cable. Poor quality cable or network connection or improper construction will cause unstable connection, video or sound disruptions, picture noise appears.

HDBaseT Distance chart by different cable:

Cable Type	Range	Pixel Clock Rate	Video Data Rate	Supported Video
CAT5e / CAT6	100m	≤225Mhz	≤5.3Gbps (HD Video)	Up to 1080p 60Hz 36 bits
	70m	>225Mhz	>5.3Gbps (Ultra HD Video)	1080p 60Hz 48bits 1080p 60Hz 3D, 4K x 2K 30Hz
CAT6a / CAT7	100m			

If connection through the wall socket, the cable length must less 5 meters between HDMI extender and wall jack, as below drawing:

Low-power Mode:

If there is no any HDMI video input, the product will enter a low-power mode to save power. Under low power mode, it still provides Ethernet, RS-232(Max. 9600bps), IR, CEC, the digital optical audio transmission.

Digital Audio Return:

This product supports the TV audio sent from HDMI ARC (Audio Return Channel) or Digital optical audio mode, from the receiver back to the transmitter end.

H02NR: When ARC and optical digital inputs signals simultaneously, it will use optical digital as priority transmission.

HE02NT: When HE02NT receives digital audio signal, it will be output simultaneously from ARC and optical digital.

Caution:

1. The wiring must away from any equipment with electromagnetic wave, i.e.: mobile phone, microwave, radio equipment, fluorescent lamp, power cable.
2. This device HDBaseT port is not Ethernet signal, do not connect with Network to avoid damage.
3. IR emitter do not put near from receiver to avoid mutual interference.
