Release Note for Vigor2136 Series

Firmware Version:	5.3.2.1
Release Type:	Regular – Upgrade recommended when convenient, as it includes general improvements and optimizations
Applied Models:	Vigor2136 / Vigor2136ax

Vigor2136 features advanced bandwidth control mechanism such as IP-layer, QoS, NAT Session Limitation, Bandwidth Borrowed, etc., to allow easy, flexible, reliable access control and bandwidth management.

New Features

- None.

Improvement

- Corrected: An issue with unexpected failure to upgrade the firmware via WUI.

Note

- None.

Known Issue

- None.

Note

Please ensure that you use the ".rst" firmware file when recovering the router. Note that uploading the ".rst" file will reset the router to factory default settings.

For certain models, a separate ".rst" (restore) firmware file may not be provided. If the ".rst" version is not available - such as for models like the Vigor3912S, DrayTek switches, DrayTek access points, and DrayOS5 routers - please manually rename the file extension of the ".all" or ".sfw" firmware file to ".rst" to create an equivalent RST firmware file.
