Release Note for VigorAP 912C

Firmware Version:	1.4.1
Release Type:	Normal
Applied Models:	VigorAP 912C

VigorAP 912C is a ceiling-mount Wi-Fi for business networks. It has a capacity of up to 256 concurrent active users, ideal for a high-density environment such as a BYOD workplace. The low-profile appearance and PoE power supply provide the flexibility in deployment.

New Features

- Support 802.11r.

Improvement

- Corrected: An issue of wireless client failed to connect to SSID with RADIUS authentication, if Management VLAN ID was used.
- Corrected: An issue of WiFi connections stability when the memory usage is over 90%.
- Corrected: An issue of configuring the WLAN profile of VigorAP by VigorConnect.
- Corrected: An issue of WLAN 2.4G SSID profile configuration via VigorACS.

Known Issue

- None.
