Release Note for VigorAP 912C

Firmware Version:	1.4.6
Release Type:	Normal
Applied Models:	VigorAP 912C

VigorAP 912C is a ceiling-mount Wi-Fi for business networks. It has a capacity of up to 256 concurrent active users, ideal for a high-density environment such as a BYOD workplace. The low-profile appearance and PoE power supply provide the flexibility in deployment.

New Features

- None.

Improvement

- Improved: Improve the OpenSSL security (CVE-2022-0778).
- Improved: Add the TR-069 default settings for the French country code.
- Improved: Add a note regarding importing the MAC Address device object list from CSV.
- Corrected: An issue of unstable 5GHz connection.
- Corrected: An issue of failure to verify AuthKey in connecting Vigor AP.
- Corrected: An issue of clients communicating with each other with the same radio but different SSIDs.
- Corrected: An issue of VigorACS Syslog not receiving the change of device name for the Syslog hostname.
- Corrected: An issue of settings in AP is not consistent with the provisioning profile (on the VigorACS server).

Known Issue

- None.
