Release Note for VigorAP 912C

Firmware Version:	1.4.7
Release Type:	Normal
Applied Models:	VigorAP 912C

VigorAP 912C is a ceiling-mount Wi-Fi for business networks. It has a capacity of up to 256 concurrent active users, ideal for a high-density environment such as a BYOD workplace. The low-profile appearance and PoE power supply provide the flexibility in deployment.

New Features

- None.

Improvement

- Improved: Improve the DNS security (CVE-2022-30295).
- Corrected: A display issue with the LED color (should be blue but shown as green instead).
- Corrected: An issue with the mesh network connection when the Mesh Root was Vigor2862 or Vigor2926.
- Corrected: An issue of APM failure on the Vigor router when upgrading the firmware of VigorAP from 1.4.5 to 1.4.6.

Known Issue

- None.
