

Release Note for VigorSwitch P2542x Series

Firmware Version:	3.10.8
Release Type:	Important – Review release notes and upgrade if the changes affect your system stability, performance, or security
Applied Models:	VigorSwitch P2542x / P2542xh

VigorSwitch P2542x, the L2+ Managed Switch (48 Gigabit/PoE Ports and 6 SFP+ Ports), is a standard switch that meets both IEEE 802.3u/ab Fast Ethernet and Gigabit Ethernet specifications. The data transmission rate reaches to up link 10G with the power budget up to 400w.

New Features

- None.

Improvement

- Improved: Improve the OpenSSL security.
- Corrected: An issue where all stacking ports could not be selected when Select All was enabled.
- Corrected: An issue where the second device could not be bound to the stack when LAGs were enabled on the stacking ports.

Note

- This version (V3.10.4) follows the previous v2.10.2 release. The version numbering has been adjusted to the 3.x.x branch to better reflect the product's advanced feature set and software evolution.
- Starting from this version, STP (Spanning Tree Protocol) is enabled by default. This may result in a slightly longer link-up time for ports.
